

**Stat 230, Spring 2016**  
**Homework 6: MLE Part 1**

Please read and understand these problems from the book: Ch 7: A9-12, B3, C3,4

**Due Thursday 3/3/16 at 11:59pm on bspace.**

From the book: Do Lab 10 in the text on page 303. For the numerical maximization step (probably the hardest part of the coding) Chi will be going over it in section on Monday. Freedman says this lab is hard, but I don't think it's much harder than other ones. The data is posted along with the assignment in a file called mle.txt.
